

WILL RODGERS LIVER HEALTH
FOUNDATION

2022

2022 Annual Report

WILL RODGERS
LIVER HEALTH
FOUNDATION

From The Founder

I'm so proud of our organization's second year of operation. Race To End HepC continues to prove the importance of a campaign specializing in outreach, education, and screening.

We reached many new people in our 2022 campaign, but there is still much work that needs to be done to end Hep C. I look forward to our next few years of exponential growth and making a difference in saving lives.

I would like to thank all of our signature sponsor, Orasure Technologies, and our supporting partners Virginia Dept. of Health, American Liver Foundation, RAO Health, Tennessee Dept. of Health, Sister Love, Florida Dept. of Health, Caring Communities, and North Carolina Dept. of Health.

Without their help, none of this would be possible.

Live liver healthy,
Will Rodgers, President

I am one who is a survivor of Hep C. When I first learned I had Hep C, there was no cure, my journey took me the route of a liver transplant and by then a cure for Hep C had been found. It's truly inspirational to see the foundation work to prevent others from having to go through the pains that I did. I would join Will Rodgers Liver Health Foundation any time in the Race To End Hep C!" (Darryl Ellis of the American Liver Foundation)

What We Did

While our budget was reduced by 39% compared to the year prior, we accomplished more in many respects. Below is the year-by-year comparison.

Budget comparison:

2021 - \$328,254

2022 - \$200,000

Testing comparison

2021 - 351

2022 - 423

Positive results

2021 - 9

2022 - 6

Number of events/days tested

2021 - 20

2022 - 17

The major difference this year was that we were better prepared. Last year we ran into a lot of roadblocks in finding certified testers for our events. So there were many events we attended that we did not test.

With our testing partners in 2022, we made sure we could test at every event that we were allowed.

EVENTS CONDUCTED:

- Nashville
- Watkins Glen
- Darlington
- Richmond
- Martinsville
- Atlanta
- Pocono
- Bristol
- Homestead
- John C. Smith University

The Future

2022 taught us the value of experience. While we had a smaller budget to work with, we actually accomplished more.

The additional stories and thank yous we received at our testing events tell us the need is still great.

So whether I race or not, the foundation will move forward with donors like you and the corporate sponsors that believe in our mission.

We will continue to learn, improve, and make an impact on liver disease in 2023.

Please continue to support us through your donations, encouragement, and spreading the word that you don't have to suffer unexpectedly from liver disease.

Get tested today!

To A Liver Healthy 2023,
Will Rodgers, President
